Results from the Diogenes

obesity diet genes

Spontaneous drop in prevalence of overweight/obesity in household children

www.diogenes-eu.org

Result in Children

- The HP groups had higher protein intake (20.7±0.7 versus 17.9±0.7 %, P=0.004) than the LP groups at mo 6.
- GI was reduced 3.5 points with LGI versus HGI (P<0.001).
- HP resulted in 2.6 cm [95% CI 0.6;4.8] (P=0.007) lower waist circumference than LP
- and a 0.25 mmol/L (P=0.003) lower LDL cholesterol, compared to LP.
- LGI vs. HGI reduced CRP (P=0.007).
- In the supermarket centers, where intervention foods were provided to the participants, protein compliance was higher, and effects more marked (P<0.001).

The NEW ENGLAND JOURNAL of MEDICINE

Weight Loss with a Low-Carbohydrate, Mediterranean, or Low-Fat Diet

"Moreover, the dropout rate was 15% in the Mediterranean group, 22% in the low-carbohydrate group, and only 10% in the low-fat group (P = 0.04). In a study involving Danish subjects, my colleagues and I also observed that there was a significantly higher dropout rate among participants on a Mediterranean diet (28%) than among those on a (real) lowfat diet (16%), after both 6 months and 18 months. Retention is an end point that deserves comment"

FACULTY OF SCIENCE

New Nordic Diet Basic principles and ingredients (1)

- 1. Danish fruits; apples, pears, plums, quince, cherries etc.
- 2. More berries; black currants, raspberries, strawberries, blueberries etc.
- 3. Danish vegetables; leafy vegetables, beets, pumpkins etc.
- 4. More cabbage all year; pointed cabbage, kale etc.
- 5. Root vegetables; parsnip, celery, carrots etc.
- 6. Leguminous fruits; more protein from plants; peas, beans etc.
- 7. Fresh herbs
- 8. Potatoes
- 9. Plants and mushrooms from the wild landscapes; ground
 elder, stinging nettle etc.

New Nordic Diet Basic principles and ingredients (2)

- 10. Wholegrain; especially more oat, rye and barley.
- 11. Nuts
- 12. Fish and shellfish; overlooked species
- 13. Seaweed
- 14. Meat of a higher quality, but less intake; free ranged animals
- 15. Game; deer, duck, pheasant etc.
- 16. Ecology; min. 75 % cereals, vegetables, milk products etc.
- 17. Avoid additives

Guidelines for the New Nordic Diet

Charlotte Mithril^{1, *}, Lars Ove Dragsted¹, Claus Meyer², Emil Blauert² Mathias Krog Holt¹ and Arne Astrup¹ ¹Department of Human Nutrition, Faculty of Life Sciences, University of Copenhagen, Rolighedsvej 30, DK-1958 Frederiksberg C, Denmark: ²Meyers Madhus, Copenhagen, Denmark

Submitted 28 March 2011: Accepted 8 December 2011

Abstract

Objective: Diet has a significant impact on health, and ensuring that the population eats a healthy diet remains a public health challenge. Research is needed in order to improve the palatability of a healthy diet and make it attractive to the

Dietary composition and nutrient content of the New Nordic Diet

Charlotte Mithril^{1, *,}⁺, Lars Ove Dragsted¹, Claus Meyer², Inge Tetens³, Anja Biltoft-Jensen³ and Arne Astrup¹ ¹Department of Human Nutrition, Faculty of Science, University of Copenhagen, Frederiksberg, Denmark: ²Meyers Madhus, Copenhagen, Denmark: ³Division of Nutrition, National Food Institute, Technical University of Denmark, Søborg, Denmark

Submitted 23 January 2012: Final revision received 1 August 2012: Accepted 23 August 2012

Abstract

Objective: To describe the dietary composition of the New Nordic Diet (NND) and to compare it with the Nordic Nutrition Recommendations (NNR)/Danish Food-based Dietary Guidelines (DFDG) and with the average Danish diet. *Design:* Dietary components with clear health-promoting properties included in

Some of the questions OPUS aims to answer

Do Nordic ingredients hold unrecognized health potential?

How can palatability be used to fight lifestyle disease?

Can we develop a new Nordic diet concept – the New Nordic Diet – as the 21st century's answer to the Mediterranean diet?

Can the New Nordic Diet strengthen the health of our planet by encouraging more sustainable food production and less environmental impact?

Work packages in OPUS

Collaboration between:

- Faculty of Science, UC
 - Department of Nutrition, Exercise and Sports
 - Department of Food Science
 - Department of Food Economics
- National Food Institute, DTU
- Meyers Madhus
- Gentofte Hospital
- The Danish School of Education
